Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

Group I. Claims 1-15, drawn to the products such as a packaged article, classified in Class 206, subclass 457 and others.

Group II. Claims 16-19, drawn to a method of packaging a liquid product which is at least semi-transparent, classified in Class 53, subclass unknown.

The inventions are distinct, each from the other because of the following reasons:

Inventions [II] and [I] are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (M.P.E.P. § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as by providing the packaged article without a plurality of lenticules and a plurality of interlaced component images.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because by their different classification and because they are capable of separate manufacture, use and sale, restriction for examination purposes as indicated is proper.

A telephone call was made to Applicant's representative on 8/21/2006 to request an oral election to the above restriction requirement, but did not result in an election being made.
